EXTRUDATES
ENGINEERING – ANIMATION

A team of extraordinary engineers for converting your ideas to videos. We will digitalize any audio, video, drawing to a 3D animation.

About Us

We are a team of qualified and enthusiastic engineers, proficient in diverse enterprises with a verve to deliver the best. With effective utilisation of modern-day technologies, blended with resourceful efforts from our part, we are equipped to deliver seamlessly integrated solutions within the estimated budget.

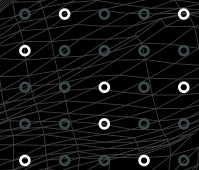

Our areas of expertise encompass high-quality animated renderings of technical as well as creative concepts, engineering services and solutions to enrich operational performances, quality ensuring inspections and training courses in various departments.

Our interdisciplinary team of young, adaptable and talented experts incessantly attempts to try and bring the best possible solutions along with the client suggested upgrades for maximum satisfaction.

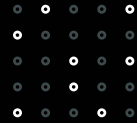

Why Choose Us?

You can always count on us when it comes to excellent and innovative solutions. Quality visualisations play a huge part and our expert technical and creative teams gather the best manifestations for your projects. We offer purpose-oriented, customised inspection services and training courses. Our proactive approach to all your needs and consultations makes us your best opportunity for hassle-free and diligent functioning.

What we do

WHAT WE DO

□ Animation Services

- a) Concept Animation
- b) Operation / Process Animation
- c) 3D Illustration

□ Engineering Services

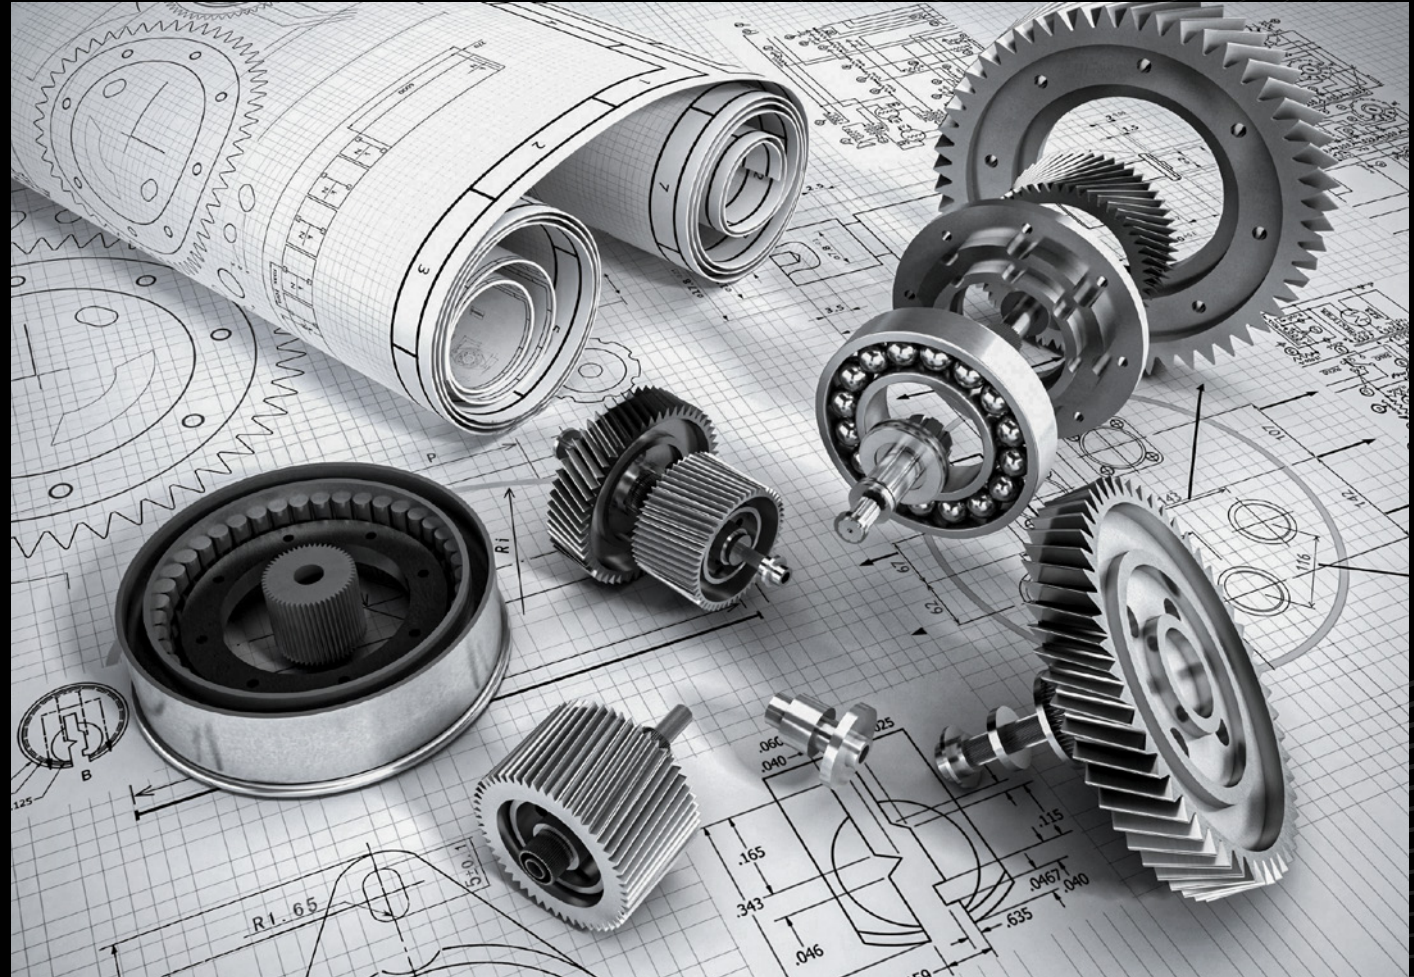

- a) Design & Analysis of Fixed & Floating Offshore Units
- b) Design for Conversion & Upgrade Projects of Offshore Vessels
- c) Transportation & Installation Studies
- d) Mep Consultant
- e) Design, Construction & Installation Support for Industrial Plants

□ Inspection Services

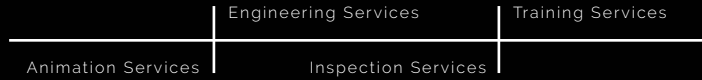

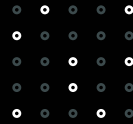

- a) NDT Services
- b) Third-party Inspection & Approval
- c) Work Scope Preparation

□ Training Services

- a) Safety & Induction Courses
- b) Technical & Application Courses
- c) Management & Leadership Courses

Animation Services

WHAT WE DO

Concept Animation

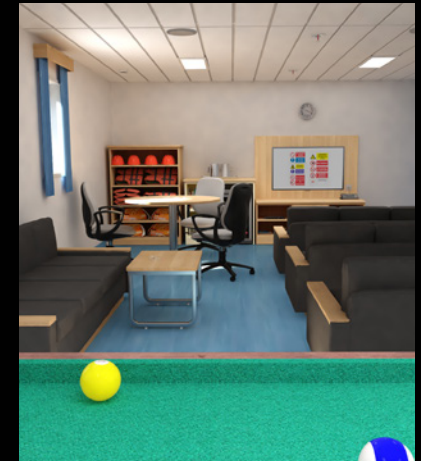

With our skillful perception of knowledge and imagination, we are able to generate coherent, reflective and masterful animated renderings of integral and wide-ranging concepts, from basic to advanced levels.

Operation / Process Animation

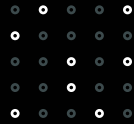

We are competent in creating accurate, high-quality and realistic animated visualisations for all manners of operations/processes. With innovative and efficient utilisation of the latest technological developments, we furnish a plethora of customised animations at request

3D Illustration

We can create 3D images / Animated Video, from your Project's 2D drawings for educating your entire Project team and thus reducing redundancies while executing the said project.

Engineering Services

Extrudates offers a wide range of engineering services that can enhance your operational performance.

Design & Analysis of Fixed and Floating Offshore Units

We have expertise in the design of various types of fixed, floating or mobile offshore units like offshore jackets, FSO/FPSO/FSRUs, Semi subs, Lift boats, MODUs, etc.

Design for Conversion & Upgrade Projects of Offshore Vessels

Offshore units may have requirement of major or minor conversions during its lifetime for specific projects or for enhancing the capabilities or life extension.

Transportation & Installation Studies

Engineering support for Loadout, Sea- fastening and Sea transportation of valuable assets like machinery, equipment, fabricated structures, and marine goods of varying sizes and values are completed in an optimal manner and to client satisfaction and insurance regulatory approvals.

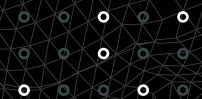

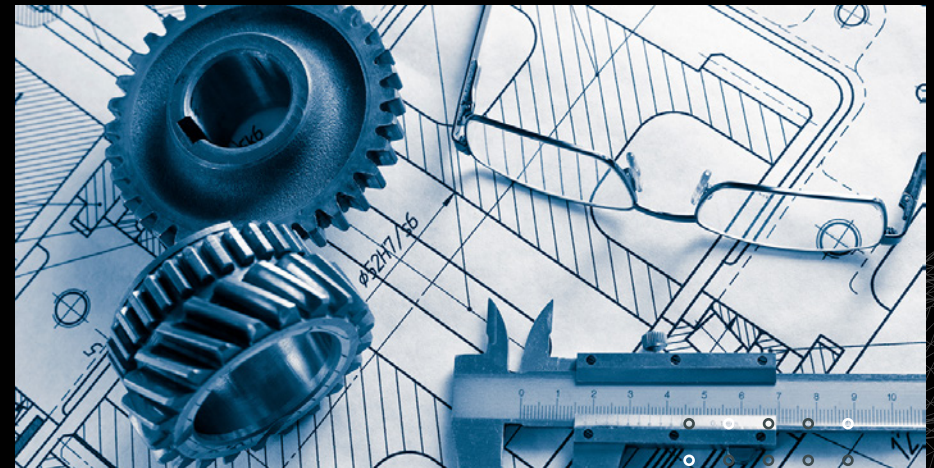

WHAT WE DO

MEP Consultant

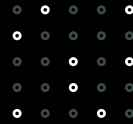

We offer quality MEP engineering that focuses on creating a safe environment for any construction or renovation project. Our best design solutions competently satisfy by budget, resource conservation, neoteric, versed team.

Design, Construction & Installation Support for Industrial Plants

A wide range of project experience and a diverse group of engineers will provide pre-construction services, construction management and installation supports with design and calculations.

Inspection Services

The necessity of safety, reliability and integrity is critical to the growth and functioning of the projects. Our expert team provides assiduous inspection services in determining all these aspects.

NDT Services

We offer a state of art and meticulous non-destructive testing methods to ensure the reliability and the soundness of products using cutting edge inspection tools and technologies.

Third-party Inspection & Approval

Our integrated Third- party Inspection Team act in the best interest of our clients throughout the project, ensuring optimal and cost-effective solutions befitting the project requirements. We offer top-notch services from qualified and experienced AWS/CSWIP/NACE/BGAS certified inspectors to administer QA QC inspections to our esteemed clients guaranteeing 100% customer satisfaction.

WHAT WE DO

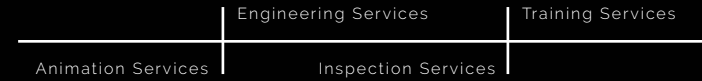

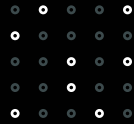

Work Scope Preparation

We proactively layout plans and prepare the work scopes for all kinds of shut down operations. Project requirements differ and is essential to maintain a schedule, minimize safety risks for personnel and keep all costs in accordance with the budget. Our technical expertise in construction management makes us the right ones to tackle all these things. The projects we handle will be benefited by our reserve of local knowledge along with overall expert services at every stage of the construction timeline.

Training services

WHAT WE DO

Our training service will help you out in developing key skills and establish a knowledge base to have a successful career ahead.

Safety & Induction Courses

We are proud to acknowledge all the courses and consultation services for our partners that are tailor-made to achieve the desired results enhanced with a set of latest techniques and tools.

Technical & Application Courses

We also provide various software training and advanced job-oriented industrial courses to help develop technical and practicability skills, fundamental to intrinsic performances.

Management & Leadership Courses

In order to master leadership and management qualities, it is crucial to identify weak points and counteract them with especial trainings to perfect these skills. These courses will indeed help you in achieving and complimenting your desired skillsets.
